NO. 28 アレルギーが増加する背景(2)

The trend towards smaller families also means that young children encounter fewer allergens in the home. In fact, it is known that children who have older brothers and sisters are more resistant to allergies. The same is true of children who share their home with a pet. Such children are much less likely to develop the very common allergy to cat or dog hair, for example.

Scientists agree that being exposed to a wider range of allergens early in life helps children to develop greater immunity. There is, however, also some data suggesting that genetics, family income, and even the parent's level of education may play a part in how likely a child is to suffer from allergies. Thus, although the hygiene hypothesis is an important area for research, we cannot yet be sure that too much attention to cleanliness is the only explanation for the enormous rise in the number of allergy victims.

1	trend	名詞	傾向・流行
2	encounter	他動詞・名詞	に(偶然)出くわす・出会い
3	resistant	形容詞	体制のある・抵抗する
4	share	他動詞・自動詞・名詞	を共有する・分担する・分担・割当
5	wide	形容詞	(幅・心・視野が)広い
6	widespread	形容詞	広範囲にわたる
7	narrow	形容詞	(幅・心・視野が)狭い・辛うじての
8	range	名詞・自動詞・他動詞	範囲・(範囲が)及ぶ・を並べる
9	realm	名詞	領域・分野
10	territory	名詞	領土・(地域・活動の)範囲・縄張り
11	district	名詞	地域・地区
12	prefecture	名詞	都・道・府・県
13	province	名詞	州・省・地方・分野
14	income	名詞	収入
15	level	名詞	水準・程度・高さ
16	horizon	名詞	地平線・水平線・範囲
17	education	名詞	教育
18	thus	副詞	このように(して)
19	hence	副詞	(文修飾)したがって
20	victim	名詞	被害者・犠牲者
21	sacrifice	名詞・他動詞	犠牲(的行為)・を犠牲にする
22	prey	名詞・自動詞	(動物の)獲物・餌食・捕食する[on]
