NO. 3 ジェスチャーの違い

---

Physical gestures may have different meanings in different cultures, and misunderstanding these signals can sometimes be embarrassing. I once had an experience which I have never forgotten. Some years ago, I took a small group of foreign students to Kyoto. I counted them with the index finger, which is common in Japan. But one of them became quiet and looked puzzled. When I asked him what was the matter, he replied, "In my country, we count people with our eyes. We use our fingers to count pigs."
